medisoft™

Better Manage Your Practice!

ALL NEW! V11 features

- **Convert statements into an easy to use statement management format** through the Medisoft conversion wizard.
- **Quick Ledger enhancements** enable users to view guarantor totals and patient totals on a single screen. New totals include Family total, the total for all of the patients under the guarantor and an Account total, the total for each specific patient under a guarantor.
- **Office notes** can be included in comment tab of the claim or statement.
- **View/Print all future appointments** for a patient.
- **Remainder statements** include patient aging and insurance aging (pending insurance balance).
- **Provider codes in the payment application** enhance workflow.
- **Rejection codes in the report designer** deliver more even more robust collection reports.

Physician Offices-Billing Service Data Collaboration Support

- Billing services and physician offices can securely share and easily merge demographic and financial data between medical practices and their billing services, improving billing process and service while saving valuable time.

ALL NEW!
V11 features

Save Even More Time and Money!

ALL NEW! V11 features

- **Procedure-based Help file.**
- **Robust Collections Worklist Management** – easily add Worklist items automatically, multi-select items to reassign or tailor worklists by adding columns to Worklist grid.
- **Enhanced Audit Generator filtering** to find information faster.
- **Edit facility** from transaction entry.

Together we're better. Medisoft helps physicians improve healthcare delivery and better manage their business with comprehensive practice management solutions.

Working Hard for You and Your Money!

V11 features

Medisoft Advanced

Robust, single-user patient accounting solution.

Medisoft Network Professional

Scalable, multi-user system for client server networks with everything Medisoft Advanced does . . . and more!

- **Comprehensive Patient Records** store x-rays, insurance cards, photos, sound and video using the multimedia feature in a patient's case
- **Management Reporting can** track activities by insurance carrier, physician, service and facility for analytical comparisons and insights
- **Instant Communication** provides quick, convenient network messaging that keeps users in contact regardless of location
- **Patient Archiving** securely stores old patient data saving disk space while maintaining electronic copies of patient information

Transaction Solutions

Our Transaction Solutions can significantly enhance your Medisoft Version 11 practice management system, improving your bottom line while delivering process automation through the following services:

- **Electronic Eligibility Verification** enables users to check patient eligibility and details automatically to improve collections
- **Electronic Remittance Advice (ERA)** saves time and improves accuracy through automatic payment posting
- **Electronic Claims Processing** reduces chance for claims rejections and collection time
- **Statement Processing** saves time and improves cash flow
- **E-Prescribing.** Send prescriptions electronically to pharmacies and avoid time-consuming phone calls and faxes to and from pharmacies
